EQUIPMENT COMPANY

Roof WarriorTM

- Rugged Construction
- Productivity
- Maximum Jobsite Safety
- Increased Flexibility

Rugged Construction means Reliability: Reduce On-Site breakdowns with the Roof Warrior's heavy gauge steel construction, solid steel welded frame, and advanced hydrostatic transaxle. Experience many hours of reliable performance and consistency with the heavy duty reinforced critical area designed frame.

Productivity: Scrape and remove material right down to the substrate in a single pass, slice right through fasteners and trouble spots with the Roof Warrior's positive blade adjustable weight design. Make less passes with the 18" blade. Tear-off debris fits in the trash chute and you always cut flush because both wheels are in the cut where they belong.

Maximum Jobsite Safety: Operators experience the highest levels of safety and complete machine maneuverability and control. The easy to use handlebar controls keep operator in control.

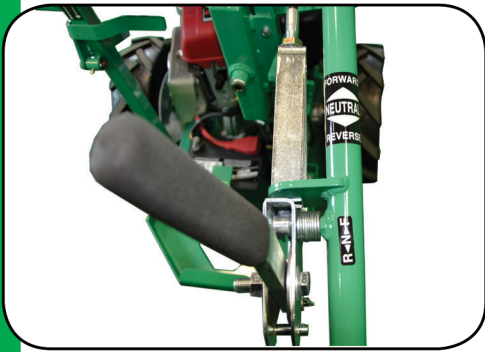

Increased Flexibility: Remove all types of material on roof deck surfaces with a portfolio of accessories, and attachments.
